WE ARE ALL SET TO DO WHEN YOU DEMAND FOR

Our customers are unique, each of them – even if they manufacture similar products. Based on deeply rooted values they know exactly what their client needs are. Committed to offering this variety of customized solutions for mechanical engineering we focus on individual proximity.

YOUR LEAD TO YOUR COMPETITORS

You are up to date to your client's prospects. Individual and reliable answers are crucial to secure custom-made solutions for your applications. Optimize your lead with support from Axel Wirth Maschinen GmbH.

Contact us and benefit from our expertise.

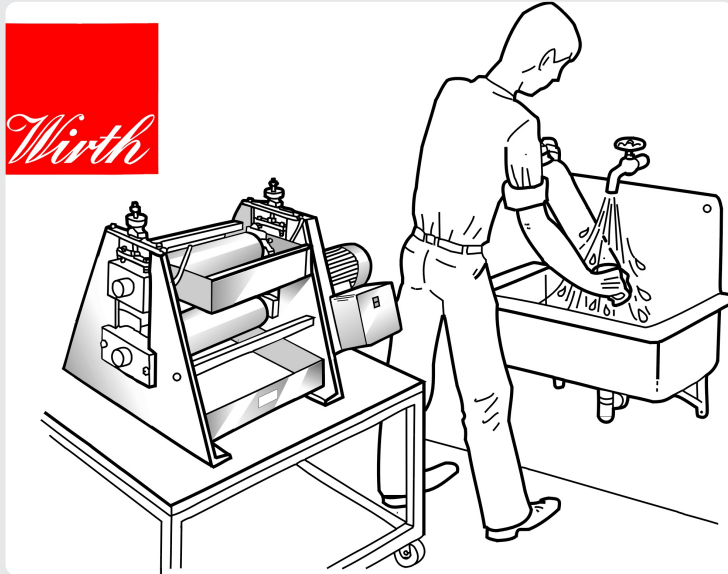

A handwritten signature in blue ink that reads "Max Wirth".

Max Wirth, CEO and owner

COMPETENCE AS A MARK OF EXPERIENCE – SINCE MORE THAN 30 YEARS

Axel Wirth Maschinen's origin is in the field of wood working industry. With our passion, love in detail, expertise and long standing experience is our aim to support you in your challenges for coating and glue application. We focus on our both mutual aim for single solutions as well as for complex projects – and not only since 1986.

TRADITION AND PROGRESS

Axel Wirth Maschinen was founded already in 1986 by Mr Axel Wirth, whose family was in the wood working industry since early 1950.

Nowadays the company is considered as authentic and admired partner in industry of coating and glue manufacturing. Max Wirth, owner and CEO, has developed this to a remarkable position. Our company's name is linked to expected quality, professionalism and efficiency. We create solutions of sustained yield in order to enable you to fulfill your customer demands.

THE PROOF OF THE PUDDING IS IN THE EATING!

Theoretically many things are possible. However only a test run is the most efficient way to figure out the best process design.

In our lab we support your ideas to a final solution with several roller coaters, glue applicators, distribution units and technical drying devices to obtain your specific result. Often this is the beginning of a new production technique.

SUCCESSFUL DEVELOPEMENT THE SWABIAN WAY: FOCUS ON SOLUTIONS, NOT ON PROBLEMS

Each task has its own specific profile of qualification and solutions are as diverse as there are branches. Multiple requirements for liquid or pasty application materials sketch versatile assignments.

Spanning various classes of business we compile concepts to fulfill those multiple requirements most efficiently. No matter whether it is the wood working industry, the automotive sector, coating for boards from glass or honeycomb woven carton, metal sheets, or spraying of 1K water based lacquer onto plastic profiles for windows production, or ceramic tiles.

JOINTLY MOVING AHEAD

You describe us your goals and we will offer you a solution how to obtain your target. Based on essential experience, knowhow and excellent professional training we ensure that innovation and quality fit together. This way we create business-solutions for you. We understand us as partners who support you on your way to success.

MADE IN GERMANY

Being experts for surface coating we customize suitable and sustainable resolutions in close cooperation with our strategic partners. Accomplishment of tasks for more than just economic reasons – also for industries of glass and carton boards, ceramic carbon car breaks as well as for shoe industry, insulation boards, ceramic tiles, fashion frames for eyeglasses, parquet production and much more. Precisely, user – driven, focused, worldwide.

All of our products are engineered and made in Germany. We manufacture machines from high-graded semifinished components from in-house construction and purchased parts are mainly from local suppliers for unique customization and well thought-through concepts.

WE LOVE TOUGH TASKS

We are looking forward to your challenges – your concern is our motivation. For innovative solutions and state of the art standards we cooperate with the Advanced Technical College of Aalen.

ASSIGN YOUR CHALLENGE

Successful concepts for surface coating require considerable knowledge about pre-treatment of substrates, material science and specific details regarding coating, stain and glue types.

Both practical experience and the right sense for the expected final results are crucial. By combining and sharing best practices and technical science we create enablers to fulfill our customer's expectations.

Concerning substrates, coatings and glues we act neutral and place the customers wish in focus to obtain required aims.

INTEGRITY AND SOCIAL WELFARE

The world consists of much more than just machines. It's the workers daily doing to build, sell, ship, install and operate our machines. It is part of our company's philosophy to think outside the box – not just technologically but also related to training of our staff.

RESPONSIBILITY

We completely produce locally on-site in Oberkochen and we love to deliver products made in Germany. Our partners are mainly from our region. Reliability and sustainable circumstances guarantee the highest efficiency and flexibility in order to keep on raising state of quality.

This gives the key advantage of location, strengthen our employees and their families and leads to long-term prosperity – for us and our customers.

We stand for cosmopolitanism, tolerance and equal rights. We support care projects for kids in Germany and Romania, for example the "Kinderhilfe für Siebenbürgen e.V.". Still, despite all commercial boundaries and limitations, we are aware of the fact that we belong to the privileged.

OUR HISTORY, YOUR SUCCESS

- 1986 foundation of company Axel Wirth, construction of first LW 100
- 1990 construction of first dose roller applicator
- 2001 start of Max Wirth at company Axel Wirth Maschinen
- 2006 construction of first distribution unit with disc brushes
- 2009 expansion of production and office facilities
- 2011 foundation of company Axel Wirth Maschinen GmbH,
with Managing Director Max Wirth

ON MISSION

Since 2012 the expansion of our technical lab goes ahead step by step.

More than 1.000 sold glue applicators, many, many dose and double dose roller applicators, distribution units and drying devices placed in nearly all European countries light up the enormous success of our business – for your lead as you benefit from decades of experience.
